

Carnisol™

An essential nutrient for energy
made with L-CarniPure®
from Soft Gel Technologies, Inc.®

energy

Carnisol™ is a new easy to swallow soft gel capsule of L-Carnitine L-tartrate made exclusively from Lonza's L-CarniPure® L-Carnitine

High Energy- L-Carnitine is the safe ergo-nutrient. Energy production in the cell depends on L-Carnitine.

Heart Healthy- Carnisol™ contains the same L-Carnitine that has been clinically demonstrated to support healthy heart function.

Burns Fat- L-Carnitine supports the transport of fat into the cell for conversion into energy.

Safe- L-Carnitine has no stimulant activity and does not interfere with normal healthy metabolism.

Effective- Clinically studies show that L-CarniPure® from Lonza aids in energy production, supports heart health and aids in fat metabolism. L-CarniPure® contains no harmful D-Isomer.

Easy- Nothing is easier than a soft gel and Carnisol™ delivers the best L-Carnitine the easiest way.

Why L-Carnitine L-Tartrate?

It works! Published research with the Tartrate salt of L-Carnitine has proven its safety and efficacy. Other companies may deliver newer fancier "molecules" but they cost more per gram and deliver less active Carnitine per gram; some even deliver harmful D-Carnitine.

Purity, Safety, Efficacy, Value...That's why!
