

Sytrinol™ in Soft Gels— A Better Delivery System

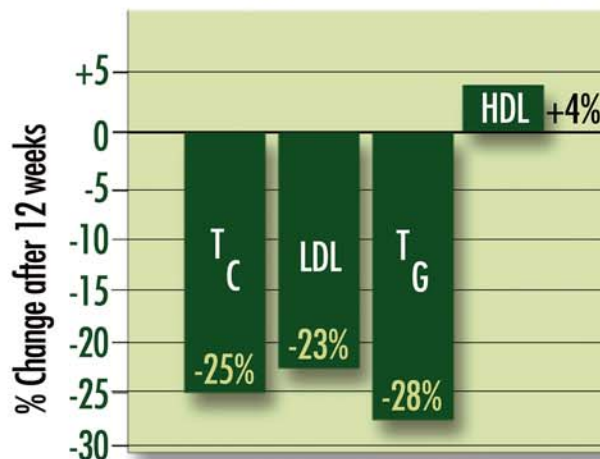

In a recent clinical trial, Sytrinol™ in soft gels manufactured by Soft Gel Technologies, Inc.® exhibited enhanced bioavailability of the key active ingredients—specifically, the two polymethoxylated flavones tangeretin and nobiletin. Compared to powder-filled, two-piece hard shell capsules, the soft gel form of Sytrinol™ was four times more bioavailable. Soft gels work better!

Sytrinol™ is a patented combination of palm fruit and citrus extracts

In a 12-week clinical trial, Sytrinol™ reduced total cholesterol (TC), LDL cholesterol (LDL) and triglycerides (TG), while increasing (good) HDL cholesterol (HDL)
